

California Dandelion

## California Dandelion

*Agoseris grandiflora*  
Sunflower Family,  
*Asteraceae*

This common native with its many rayed yellow to red flowers, blooms in various coastal environments from May through July. The multi lobed basal leaves form a rosette. You will find this perennial herb in foothill woodlands, chaparral, valley grasslands, and woodlands.

**May-Jul • Ma, So, Na, Me**  
**6-12 cm, 2-5 in**

## Yellow Skunk Cabbage

*Lysichiton americanum*  
Arum Family, *Araceae*

Very large oval leaves, perhaps 1-5 feet wide, accompany the large yellow envelope like bract that surrounds the narrow pokerlike spike of tiny flowers. The flowers are indistinct, yellow green and ill smelling, hence the common name. Found in shady, swampy areas, or stream areas, this plant is uncommon in our area.

**Apr-Jul • Ma, So, Me**  
**30-60 cm, 1-2 ft**
