

Nature / Wildflowers

Take a photographic journey through four of the west coast's most beautiful counties: Marin, Sonoma, Napa, and Mendocino. You will see 542 full color images of the native plants of this area, the familiar as well as rare and shy beauties that must be sought out.

- Discover 358 species of wildflowers
- Easy to use: grouped by color, close up photos for identification
- Learn bloom times, habitats, garden tips, native uses, natural history, wildflower hot spots

For the past 17 years Reny has focused her lens on wildflowers. Her images appear in books, on cards and posters, and the web at Renyswildflowers.com. She is past president of the Milo Baker Chapter of the California Native Plant Society. In spring and summer Reny roams the west indulging in her passion to communicate the delicate beauty of wildflowers. In fall and winter she settles into her secluded, off the grid home, tucked into the North Coast Ranges with husband and cats.
